About Us

At Pinnacle Edu we dare to imagine more just and equitable futures for all learners. One where students, teachers, caregivers, and community partners, have necessary and legitimate roles to play. Where through collaboration and co-creation members of the school community achieve both individual and collective excellence. Areas of expertise include (but not limited to):

equity pedagogy, research and evaluation, competency and Pan-Canadian science education, and translating policy to practice.

Quality education for all.

Key Customers

Pinnacle Edu operates across all sectors –*formal, informal and non-formal* of the K20 education landscape but its work is best known in the formal sector starting from elementary, to middle, and high schools, and through to higher education. Families, teachers, school board, subject area and teacher associations, faculties of education, provincial and territorial departments of education, not-for-profit organisations, and other government agencies have accessed our expertise to further their organisational goals and extend curated resources.

“ *Data informed.
Results focused.* ”

Products and Services

We offer diverse products and resources for learners, formal and informal educators, teacher-leaders, and professional learning networks during in school hours as well as after the bell, increasing system capacity and transforming education. Whether you're looking for customised professional development programs, consulting services to support with curriculum evaluation and mapping, program development or instructional resource design, we will work *with you* towards achieving your goals.

Educational Services available include:

- **Contextualising the Global Goals:** Mapping school improvement plans or thematic interdisciplinary programs of study against the United Nations 17 SDGs to provide a reportable context and cultivate transformative teaching and learning practices.
- **Equity Pedagogy:** Knowledge mobilization centred on dimensions of diversity, intercultural competence and culturally inclusive tools and strategies to increase quality of learning opportunities.
- **Professional Development:** Cultivating future-oriented leading practices in education to inspire beautiful risk-taking by students, teachers and administrators.
- **Research and Evaluation:** Analysis of programme activities (e.g. equity audit, curriculum mapping, etc.) to identify leading practices and improve institutional performance.
- **Resource Development:** Creation of educational products and tools relevant to Pan-Canadian contexts to improve learner outcomes and educator efficacy.
